Academics

Executive Post Graduate Certificate Programme in Cloud Computing & DevOps (*IIIT Bangalore*)	2024 2025, 3.64 (1st Grade)
Masters in Computer Application, MCA *(Rajarshi School of Management & Technology (AKTU), Varanasi)*	2013 – 2016, 67% (1st Class)
Bachelors in Computer Application, BCA *(Jeevandeep Institute of Management Technology (MGKV), Varanasi)*	2010 – 2013, 66.6% (1st Class)

Technical Skills

Category	Skills
Web Designing	HTML, CSS, JavaScript, jQuery, AJAX, Bootstrap, PHP, Laravel, WordPress, MERN (MongoDB, Express, ReactJS, NodeJS)
Databases & Data Tools	PostgreSQL/PGAdmin-4, MySQL, Google Big Query, SQLite, MS Excel (Advanced), Google Sheets
DevOps & Cloud	AWS (EC2, S3, CodePipeline), Azure
Containerization & Orchestration	Docker, Kubernetes (Minikube, cluster setup, troubleshooting)
CI/CD & Automation	Jenkins pipelines, Bash scripting, credential automation
Web Hosting & Control Panels	CyberPanel, cPanel, HestiaCP, VPS/EC2 deployments
Programming & Configuration	PHP (dynamic projects), MySQL, YAML configuration

Project Experiences

Category	Project	Tools/Tech	Highlights
CI/CD & Automation	CI/CD pipelines in Jenkins	Jenkins, Docker	Automated Docker image builds & pushes
	CI/CD pipeline with GitHub Actions	GitHub Actions, Docker	Streamlined workflow for containerized apps
	Automated monitoring & credential tracking	Bash, Uptime Kuma	Custom scripts for uptime & credential management
Cloud Infrastructure	Web app deployment on AWS EC2	AWS EC2	Deployed and managed scalable web applications
	3-tier VPC setup	Terraform, AWS	Designed secure, multi-tier cloud architecture
Containerization & Orchestration	Example-voting-app deployment	Kubernetes	Hands-on with Kubernetes workloads
	Kubernetes cluster management	Minikube, Kubernetes	Resolved API server connectivity & driver mismatches
	Uber/Python sample app	Docker	Containerized Python application
Web Development (Portfolio)	Stack Overflow clone	MERN stack	Full-stack project deployed successfully
	CMS (Content Management System)	PHP	Built dynamic content management system
	Angel Beauty Cares & Spa	Laravel	Business website with database integration
	Online Store	WordPress	E-commerce site with payment integration

Work Experience

DevOps Intern, Adversity Solutions (Remote) **June'25 – Dec-25**

- Currently I am working as a devOps intern in adversity solution company role based is managing and monitoring projects using Web Host Manager/cPanel, Hestia, and CyberPanel.
- Using tools for monitoring Grafana, loki, uptime kuma etc

Upskilling and Project Assignments **Mar'24 – May'25**

- Worked on Admin Dashboard for data analysis and visualisation to visualize company's different KPI on REACT.
- Actively contributing to open-source projects to refine coding skills with applications of different libraries (SCSS, React-router dom, Recharts etc.) and worked with Tailwind CSS stay updated with industry trends.
- Engaging in a rigorous self-directed learning program to master the latest web development frameworks and tools to leverage my technical skills and creative problem-solving abilities to contribute to innovative projects.

Web Developer Intern, Nucleus Technologies (Remote) **Oct'23 – Mar'24**

- Internship focused on MERN stack; first month dedicated to in-depth review and hands-on experience.
- Developed Stack Overflow clone, showcasing MERN proficiency. Front-end tasks included dynamic UI construction with ReactJS, utilizing Redux and Redux-Thunk for state management.
- Back-end responsibilities involved Node.js with Express, MongoDB with Mongoose.JS for database operations, and JWT for secure user authentication. Maintained project version control with GitHub.
- Successfully deployed fully functional web application on Render cloud platform, demonstrating comprehensive full-stack development skills.

***Telecalling Executive*, Slice (Bangalore, Karnataka)** **Mar'22 – May'23**

- Utilized technical expertise to seamlessly integrate 'Orbit Software' into the current infrastructure, facilitating smooth data flow and precise customer payment updates.
- Oversaw comprehensive assessment of customer payment statuses, employing advanced communication tools to interact with customers, ensuring precise and accurate payment updates. Contributed to enhancing the efficiency of the payment processing workflow within Slice company's Credit Card division.

***Risk Management Junior Operator*, Home Credit India Finance (Bangalore, Karnataka)** **Apr'19 – Nov'20**

- Primary responsibility involved meticulously reviewing and analysing customer payment details, ensuring accuracy and compliance with company policies and played a vital role in providing technical support to customers, patiently addressing their queries, concerns, and issues related to the loan process and payment systems.
- Through my technical expertise and proactive approach, I consistently ensured seamless payment management and resolution of customer inquiries, contributing to the success of Home Credit in delivering exceptional service to its customers.

***Trainee*, NextGen Infotech (Varanasi, UP)** **Jul'18 – Dec'18**

- Completed training in "Website Designing & Developing using PHP with MySQL," gaining hands-on experience.
- Executed PHP PDO project training for "Online shopping & CMS," employing industry best practices.
- Utilized front-end technologies like DHTML, CSS, Bootstrap, and jQuery, alongside MySQL for efficient data management. Demonstrated PHP expertise in dynamic web application development, ensuring high-quality solutions and user experiences.

***PHP Intern*, Epsilon Wings Infotech, Varanasi, UP** **Feb'16 –Aug'16**

- Worked in a PHP-based project titled "Faculty Tracking System Using GPS," demonstrating proficiency in web development and technical expertise in PHP programming.
- Developed practical knowledge by designing and implementing a system that tracks the location of faculty members using GPS technology.
- Gained hands-on experience in utilizing PHP frameworks and libraries to build robust and secure web applications, incorporating functionalities such as real-time location tracking, data visualization, and user management.

Career Objective

Aspiring DevOps Engineer eager to contribute to scalable, secure, and automated infrastructure solutions while continuously learning and growing in cloud-native technologies.
